

In the claims:

Please amend the claims as follows:

505  
F17  
1. (Currently amended) A web browser program executable by a client computer connectable to server computers by a computer network, the web browser program automatically reconfiguring chrome of a user interface to the web browser program to provide a user access to any one of groups of related information, the web browser program comprising:

a content display program configured to receive content data from a current web site of a current server computer, and to cause information representative of the content data to be displayed on a content portion of a display of the client computer;

a chrome display program configured to cause chrome that corresponds to chrome specifiers in a chrome configuration database to be displayed on a chrome portion of the client computer display;

E1  
a current site communication program configured to provide an indication of the current server computer to related information servers indicated by a related information servers indication;

a chrome configuration processing program configured to receive, from the related information servers, related information designators provided to the client computer based on the indication of the current server computer, and to provide the related information designators as chrome specifiers in the chrome configuration database such that the chrome display program displays the related information designators as part of the chrome; and

a related information servers indication receiving program configured to receive the related information servers indication from at least one of the server computers such that the related information servers indication is dynamically reconfigurable,

wherein the chrome corresponding to the chrome specifiers of the current web site being rendered and displayed by the chrome display program ~~correspond to content from the current web site of the current server computer~~ adds a new element to the chrome being displayed while maintaining at least one element of the chrome that was displayed prior to the addition of the new element.

2. (Previously Amended) The web browser program as claimed in claim 1 wherein the related information servers indication receiving program is configured to receive the related information servers indication in a RDF format.

3. (Previously Amended) The web browser program as claimed in claim 1 wherein the related information designators received from the related information servers specify the appearance of at least one sub-portion of the chrome portion of the client computer display and a behavior associated with user activation of the sub-portion.

4. (Previously Amended) The web browser program as claimed in claim 3 wherein at least one of the related information designators received from the server computer specifies the behavior as a JavaScript method.

5. (Previously Amended) The web browser program as claimed in claim 1 wherein the at least one of the server computers from which the related information servers indication is received by the related information servers indication receiving program is a trusted server computer to which the web browser program causes the client computer to connect.

6. (Previously Amended) The web browser program as claimed in claim 5 wherein the trusted server computer is a default server computer to which the web browser program causes the client computer to connect upon a first execution of the web browser after a predetermined event.

7. (Previously Amended) The web browser program as claimed in claim 6 wherein the predetermined event is installation of the web browser program on the client computer.

8. (Previously Amended) The web browser program as claimed in claim 1 wherein the web browser program causes the client computer to provide to the related information servers an indication of a demographic of the user, and the related information provided by the related information servers corresponds to that demographic.

9. (Previously Amended) The web browser program as claimed in claim 8 wherein the demographic is an indication of an identity of the user.

10. (Previously Amended) The web browser program as claimed in claim 1 wherein the related information provided by the related information servers includes at least one link to a web site having content the subject matter of which is related to the subject matter of the current web site and a review of the current web site.

11. (Previously Amended) The web browser program as claimed in claim 1 the web browser program further comprising:

a confirmation program configured to confirm whether the user desires to store a related information server indication in a related information server indication database and to control that storage based on the confirmation,

wherein the servers to which the current server computer indication is provided are limited to servers having indications in the related information server indication database.

12. (Currently amended) A web browser program executable by a client computer connectable to server computers by a computer network, the web browser program automatically reconfiguring chrome of a user interface to the web browser program to provide a user access to any one of groups of related information, the web browser program comprising:

a content display program configured to receive content data from a current web site of a current server computer, and to cause information representative of the content data to be displayed on a content portion of a display of the client computer;

a chrome display program configured to cause chrome that corresponds to chrome specifiers in a chrome configuration database to be displayed on a chrome portion of the client computer display;

a current site communication program configured to provide an indication of the current server computer to related information servers indicated by a related information servers indication;

a chrome configuration processing program configured to receive, from the related information servers, related information designators provided to the client computer based on the indication of the current server computer, and to provide the related information designators as chrome specifiers in the chrome configuration database such that the chrome display program displays the related information designators as part of the chrome; and

a related information servers indication receiving program configured to receive the related information servers indication from at least one of the server computers such that the related information servers indication is dynamically reconfigurable,

wherein the chrome corresponding to the chrome specifiers and displayed by the chrome display program corresponds to a language demographic of the user is based on chrome specifiers provided by a web site that is controlled by a party providing content for the current web site being rendered.

13. (Currently amended) A web browser program executable by a client computer connectable to server computers by a computer network, the web browser program automatically reconfiguring chrome of a user interface to the web browser program to provide a user access to any one of groups of related information, the web browser program comprising:

a content display program configured to receive content data from a current web site of a current server computer, and to cause information representative of the content data to be displayed on a content portion of a display of the client computer;

a chrome display program configured to cause chrome that corresponds to chrome specifiers in a chrome configuration database to be displayed on a chrome portion of the client computer display;

a current site communication program configured to provide an indication of the current server computer to related information servers indicated by a related information servers indication;

a chrome configuration processing program configured to receive, from the related information servers, related information designators provided to the client computer based on the indication of the current server computer, and to provide the related information designators as

chrome specifiers in the chrome configuration database such that the chrome display program displays the related information designators as part of the chrome; and

a related information servers indication receiving program configured to receive the related information servers indication from at least one of the server computers such that the related information servers indication is dynamically reconfigurable,

wherein the chrome corresponding to the chrome specifiers and displayed by the chrome display program are based on at least one of the content and the chrome of past web sites selected by the user computer corresponds to a chrome that includes words that are based on a language demographic of the user.

14. (New) A web browser program executable by a client computer connectable to server computers by a computer network, the web browser program automatically reconfiguring chrome of a user interface to the web browser program to provide a user access to any one of groups of related information, the web browser program comprising:

a content display program configured to receive content data from a current web site of a current server computer, and to cause information representative of the content data to be displayed on a content portion of a display of the client computer;

a chrome display program configured to cause chrome that corresponds to chrome specifiers in a chrome configuration database to be displayed on a chrome portion of the client computer display;

a current site communication program configured to provide an indication of the current server computer to related information servers indicated by a related information servers indication;

a chrome configuration processing program configured to receive, from the related information servers, related information designators provided to the client computer based on the indication of the current server computer, and to provide the related information designators as chrome specifiers in the chrome configuration database such that the chrome display program displays the related information designators as part of the chrome; and

a related information servers indication receiving program configured to receive the related information servers indication from at least one of the server computers such that the related information servers indication is dynamically reconfigurable,

wherein the chrome corresponding to the chrome specifiers and displayed by the chrome display program corresponds to content from the current web site of the current server computer such that the chrome is based on a chrome specifier corresponding to the current web site being rendered when a chrome specifier is associated with the current web site and the chrome returns to a default chrome when a chrome specifier is not associated with the current web site.

15. (New) The method of claim 1 wherein the chrome corresponding to the chrome specifiers of the current web site being rendered and displayed by the chrome display program adds a new element to the chrome displayed based on past web sites rendered by the client computer while maintaining at least one element of the chrome displayed prior to the addition of the new element.
